Verathon Glidescope AVL Video Laryngoscope – Refurbished

Stock Photo – Options May Vary

FULLY REFURBISHED · CLINICALLY CERTIFIED

Verathon GlideScope AVL Video Laryngoscope – Refurbished. This system is a trusted, reusable video laryngoscope built for high-volume ORs, ICUs, and trauma centers.

It pairs the reusable GlideScope GVL blade, angled at 60 degrees, with a high resolution color monitor. Furthermore, because the monitor uses Reveal anti-fog technology and a built-in LED light, you get a clear, wide-angle view that helps cut down on failed intubations, even in difficult airways.

The AVL system runs on a digital platform, unlike the standard GVL system's analog platform, so you also get real-time video recording and snapshot capture built in.

FEATURES

- 60 degree angulated reusable GVL blade
- Reveal anti-fog technology with integrated LED
- Real-time video recording and snapshot capture
- Export to external displays
- Rugged, reusable design for daily use
