Blickman Paul Cabinet | 7970SS

Stock Photo – Options May Vary

FACTORY NEW

Blickman 7970SS – Paul Cabinet. Blickman's stainless steel cabinets feature a seamless welded face, which prevents dirt buildup and adds long-lasting durability. The welded design enhances strength and corrosion resistance, making these cabinets ideal for medical, surgical, and laboratory settings.

They are available as freestanding units with four sturdy legs and glides or can be equipped with casters for easy mobility. The Paul Cabinet includes 2″ casters for smooth transport and five adjustable glass shelves, spaced every half inch.

These shelves provide customizable storage for instruments and supplies, allowing staff to organize equipment efficiently and access items quickly during procedures or daily tasks.

FEATURES

- Freestanding
- Two locked glass swinging doors on three hinges
- Five glass shelves
- Adjustable shelves every ½”
