

Harloff Cart Locking Options

Stock Photo - Options May Vary

FACTORY NEW

Harloff Cart Locking Options provide customizable security solutions for medical carts in healthcare environments. Each system controls access efficiently while keeping equipment and medications safe. With a variety of locks, closure systems, and key override features, these solutions offer flexibility for different operational needs.

Facilities can select the ideal locking system based on their specific workflow and security requirements. Harloff designs custom locking mechanisms for specialized operations, helping healthcare teams maintain compliance while improving daily efficiency. These systems integrate smoothly into existing cart configurations.

Harloff manufactures each lock with strong materials and careful design to prevent unauthorized access and tampering. The durable construction provides reliable protection in busy healthcare areas, whether used on standard carts or specialized units.
