ISOLUX IsoLED II Surgical Headlight System | IL-2317

Stock Photo – Options May Vary

FACTORY NEW

ISOLUX IsoLED II Surgical Headlight System IL-2317 is a portable LED surgical headlight that adds light to the operating room while keeping the surgeon or practitioner mobile. It delivers 25,000 lux at 300 mm (12 inches) of 4500° K white light. In addition, the LED has a life expectancy of 50,000 hours, or about 20 years.

The IsoLED II is cost-effective and suits all applications, especially dental and veterinary use. Meanwhile, the adjustable aperture and sterilizable joysticks give you easy spot control and superior clarity. Furthermore, this surgical headlight system uses 2/3 less energy than halogen lamps and surpasses Energy Star requirements.

ISOLUX has made surgical headlights, video cameras, and examination lights since 2003.
