UMF FusionFREEDOM™ Exam Chair

Stock Photo – Options May Vary

FACTORY NEW

The UMF FusionFREEDOM™ Exam Chair meets the latest ADA standards recommended by the U.S. Access Board for inclusive care. A low seat height of 17 inches enables safer, easier, and more independent transfers for patients with mobility challenges.

It accommodates 95% of wheelchair users who are capable of self-transfer, promoting accessibility in clinical environments. Over 20 million adults face mobility limitations, yet many exam rooms still use non-adjustable, fixed-height tables. FusionFREEDOM helps close that gap by offering a practical, ADA-compliant alternative for modern healthcare settings.

TruComfort™ Support Rails provide added stability, reducing fall risk and supporting patient and caregiver safety during exams.
