Oakworks 3000 Series Procedure Chair

Stock Photo – Options May Vary

FACTORY NEW

The Oakworks 3000 Series Procedure Chair is a fully powered, ADA-compliant solution designed for a wide range of clinical procedures. Its smooth, electric adjustments for height, backrest, leg rest, and Trendelenburg/reverse Trendelenburg enhance both patient comfort and provider efficiency. The hand control features programmable memory positions, allowing quick transitions between exam setups.

With an ADA-compliant low height of 19″, patient transfers are safer and easier. The 2.5″ Comfort Foam pad is removable for cleaning or replacement, while water-resistant fabric withstands common disinfectants. An open base design improves ergonomic access, and optional wide headrest extension adds further versatility.

Customize your table with 16 fabric color options. Includes an 18″ paper roll holder.
