

Harloff Mini Narcotics Cabinet | NC09B07-ST1

Stock Photo - Options May Vary

FACTORY NEW

The Harloff Mini Narcotics Cabinet NC09B07-ST1 is a compact, secure storage solution designed for healthcare settings including VA hospitals, long-term care facilities, and veterinary clinics. It features a single locking door with key lock and includes four keys. The cabinet is constructed from durable 20-gauge steel with heat-sealed powder-coat paint for lasting protection.

Measuring 9" H x 7" W x 6" D and weighing only five pounds, this cabinet is ideal for storing smaller quantities of medications. Its compact size allows for easy wall mounting or convenient transport between locations. The cabinet does not include internal shelving due to its small form factor.

The cabinet complies with DEA guidelines for storing Schedule III, IV, and V controlled substances when used within a locked environment. It is not suitable for Schedule I or II substances without additional security measures. Users should refer to current DEA regulations to ensure full compliance.
