

Harloff Mini Narcotics Cabinet | NC09B07-ST2

Stock Photo - Options May Vary

FACTORY NEW

The Harloff Mini Narcotics Cabinet NC09B07-ST2 offers reliable double-lock security in a compact design for safeguarding controlled substances. This vertical cabinet features a single door with two separate key locks, each with four keys, allowing shared access among staff while maintaining strict accountability. Built from durable 20-gauge steel and finished in beige, it provides sturdy protection in a lightweight, portable form.

Measuring 9" H x 7" W x 6" D and weighing just five pounds, the cabinet is easy to transport or mount on a wall using included pre-drilled holes. Its compact size eliminates the need for internal shelving, making it ideal for facilities needing to store smaller quantities of medications while maintaining high-level security.

The NC09B07-ST2 meets DEA guidelines for storing Schedule III, IV, and V controlled substances when used within a secured environment. It is not recommended for Schedule I or II substances unless additional DEA criteria are met.
