

Bair Hugger 675 Series Rolling Cart - Refurbished

Stock Photo - Options May Vary

FULLY REFURBISHED · CLINICALLY CERTIFIED

The Bair Hugger 675 Rolling Cart is designed for seamless transport of 675 series warming units in dynamic clinical environments. Its lightweight, compact design allows easy movement between patient rooms and different areas of the facility, with convenient storage space for blankets to keep everything organized and accessible.

The cart is easy to maneuver through tight or busy spaces, improving workflow in high-traffic areas. It securely holds the warming unit and offers ample space for additional accessories or blankets, optimizing space use without crowding clinical settings.

Durable construction ensures reliable performance during daily use. Healthcare teams can depend on this cart to transport warming units safely and efficiently, simplifying workflow and allowing professionals to focus on patient care while maintaining an organized environment.
