Burton Epic® LED Magnifier | EML

Stock Photo – Options May Vary

FACTORY NEW

The Burton EML Epic LED Magnifier is designed for demanding clinical and industrial environments. This high-performance magnifier delivers bright, uniform LED illumination that reduces shadows and improves clarity. As a result, users can perform detailed examinations with greater confidence and accuracy.

Its large optical lens provides a wide viewing area, making it ideal for extended use. In addition, the Epic LED Magnifier features a flexible, self-balancing arm that stays exactly where you position it. You can easily adjust the light without tightening knobs or locks.

Furthermore, the circular LED module ensures consistent lighting and excellent color rendering.

FEATURES

- Smooth surface, easy to clean, anti-microbial coating
- Delivers bright, shadow-reduced illumination with circular LED design
- Enhances detail visibility with 3.5-diopter optical glass lens
- Provides wide viewing area for comfortable, extended use
- Ensures precise positioning with self-balancing, flexible arm
