

Biodex 870 Replacement Pad

Stock Photo - Options May Vary

FACTORY NEW

The Biodex 870 Replacement Pad is a non-OEM cushion designed specifically for the Biodex 870 imaging table. It provides reliable comfort, durability, and consistent performance to support clinical imaging procedures with proper patient positioning and stability.

This replacement pad measures 97 inches long, 24 inches wide, and 2 inches thick, delivering full table coverage and even support. The durable design withstands frequent use in busy healthcare settings while helping maintain proper patient positioning during procedures.

Two styles are available: a rectangular version and a version with a contoured head section and face cutout. The pad installs easily as a direct replacement and helps reduce workflow delays and equipment downtime.
