

SchureMed Multi-Axis Arm Positioner | 800-0050

Stock Photo - Options May Vary

FACTORY NEW

The SchureMed Multi-Axis Arm Positioner, model 800-0050, accommodates seated, lateral, prone, neuro, and park bench positions, providing flexibility for various surgical procedures. The innovative ball socket locking system allows easy adjustments to fit each patient's size and specific position, enhancing stability and support for accurate arm positioning throughout the procedure.

Designed for durability, the positioner withstands the demands of high-volume surgical environments. Its ergonomic design improves patient comfort while optimizing the surgeon's access and control during procedures. A deluxe concave foam pad is included for enhanced support.

FEATURES

- Surgical Procedures in seated, lateral, prone, neuro, and park bench positions
- New ball socket locking system for every patient size and position
- Deluxe Concave Foam Pad Included

SPECIFICATIONS

- Platform Dimensions: 6"W x 16"L
- Mounting Post Diameter: 5/8"
- Pad Thickness: 2"
- 3 Schure Socket XL required
