

Steris-Birkova Universal Surgical Table Safety Strap: PR-3500

Stock Photo - Options May Vary

FACTORY NEW

The Steris-Birkova PR-3500 Universal Surgical Table Safety Strap is a patient restraint system designed to provide secure positioning and stability during surgical procedures. The strap delivers unobstructed surgical access while maintaining total patient immobilization without discomfort.

The PR-3500 fits easily on surgical tables, arm boards, beds, and stretchers, making it suitable for general surgery, orthopedic, and cardiac procedures. Its ergonomic design simplifies patient transfer between surfaces and improves overall workflow efficiency.

Constructed from high-quality, durable materials, the strap withstands repeated cleaning and sterilization cycles. The metal-free and latex-free design ensures compatibility with various patient populations and surgical environments.
