Medical Illumination MI-1000 Dual Ceiling LED Surgical Light | XLD-DC

Stock Photo – Options May Vary

FACTORY NEW

The Medical Illumination MI-1000 Dual Ceiling LED Surgical Light features exceptional quality, energy-efficient operation, and cool, bright output. It provides bright white light from multiple LED spots, enabling excellent shadow control. The thoughtful design of the MI-1000 improves tissue rendition for exams or minor procedures.

Furthermore, lighting equipment (excluding replacement parts) has a three-year limited warranty. Long-life LEDs last up to 50,000 hours and require no replacement bulbs or fuses. As a result, this reduces overall maintenance costs.

Moreover, with multiple mounting options, the MI-1000 offers excellent value for those seeking advanced technology in medical lighting. For reference, the model number is XLD-DC.

FEATURES

- Very Low Heat
- High Efficiency
- Half the Electric Consumption of Standard Halogen Lights
- Long Life L.E.D.
- 36 High Efficiency LEDs

SPECIFICATIONS

- Light Intensity at 1 MTR: 100,000 lux
- 4300° Kelvin Color Temperature
- Rated Bulb Life: 50,000 hours
- Field Size at 1 MTR: 6" Diameter
- Diameter: 18" diameter, Multi-Faceted
