Medical Illumination MI-300 Exam light

Stock Photo – Options May Vary

FACTORY NEW

The Medical Illumination MI-300 Exam light delivers bright, precise illumination for exams and minor procedures. It provides superior color accuracy with a CRI of 97. Additionally, it produces a clean 4,300K white light for better visibility.

Clinicians benefit from consistent, shadow-free lighting in demanding environments. As a result, this LED exam light supports accurate diagnostics across dermatology, dentistry, and general practice. Designed for flexibility, the MI-300 features a fully adjustable gooseneck arm for precise positioning.

Moreover, the mobile caster base allows easy transport between rooms. Users can quickly adapt lighting angles without interrupting workflow. In addition, dual brightness settings provide control for different procedures.

FEATURES

- Bright, color-accurate LED illumination (CRI 97)
- Dual brightness settings (high/low)
- Long-life LEDs (50,000 hours)
- Flexible gooseneck for precise positioning
- Cool, low-heat light output for comfort
