

Burton Nova Exam LED Table Mount | NXT

Stock Photo - Options May Vary

FACTORY NEW

The Burton NXT Nova Exam LED Table Mount delivers bright, uniform illumination for medical exams and procedures, producing up to 90,000 lux at 18 inches. A 4100K color temperature provides clean, natural white light with CRI above 95 for accurate rendering of tissue and skin tones, ensuring precise visibility in clinical environments.

Designed for flexibility, the Burton NXT features a patented K-arm for smooth, drift-free positioning with minimal adjustment effort. Dual intensity settings allow quick switching between low and high illumination, while the compact head supports easy cleaning and maintenance. Multiple mounting options accommodate floor, wall, table, or ceiling configurations.

Built for efficiency, the Nova Exam LED includes a 50,000-hour LED lifespan and low power consumption that reduces maintenance and operating costs. The cool, low-heat light output improves patient and staff comfort, while the durable design ensures consistent performance in demanding clinical settings.

FEATURES

- Bright, uniform beam pattern for clear exams
- High color accuracy for better tissue visualization
- Dual intensity settings for procedure flexibility
- Patented K-arm for smooth, drift-free positioning
- Long-life LEDs minimize maintenance and downtime

SPECIFICATIONS

- Light intensity: 45,000 lux (low) / 90,000 lux (high) @ 18"
- Color temperature: 4100 K
- CRI: >95
- LED life: 50,000 hours
- Power consumption: 7W (low) / 14W (high)
