

Valleylab Universal ESU Cart – Refurbished

Stock Photo - Options May Vary

FULLY REFURBISHED • CLINICALLY CERTIFIED

The Valleylab Universal Mounting Cart consolidates two electro-surgical generators and one smoke evacuator on a single, compact platform. This integrated design improves operating room workflow and frees valuable space for essential surgical tasks while supporting smooth mobility for quick equipment repositioning.

The cart is compatible with all Valleylab ESU models and supports the OptiMumm Smoke Evacuator, providing surgical teams with a single, reliable solution for multiple devices. The sturdy frame holds equipment securely while the compact footprint allows easy placement in tight clinical areas.

This cart serves General Practice, ENT, Dermatology, OBGYN, and Surgery Centers. Staff can transfer equipment between procedures without delays, and the durable construction supports long-term daily use in demanding clinical environments.
