

Aaron Bovie Bipolar Footswitch for Model 2250 and 3250 ESU | BV1254B

Stock Photo - Options May Vary

FACTORY NEW

The Aaron Bovie Bipolar Footswitch Model BV1254B is compatible with Aaron Bovie Electrosurgical Units (ESU) Models 2250 and 3250. It offers hands-free control for bipolar electrosurgical procedures, enabling smooth and precise operation during surgeries. The footswitch provides reliable activation and deactivation of the ESU.

Designed for tissue coagulation, cutting, and cauterization applications, this footswitch enhances both safety and performance during electrosurgical procedures. It integrates seamlessly with the Aaron Bovie 2250 and 3250 models, delivering the precision and control necessary for effective electrosurgical operations.

The footswitch is durable and easy to use, making it a dependable accessory for surgical teams requiring consistent hands-free control during procedures.
