

Alaris Medley 8000 POC Infusion Pump - Refurbished

Stock Photo - Options May Vary

FULLY REFURBISHED · CLINICALLY CERTIFIED

The Alaris Medley 8000 POC Infusion Pump is designed for neonatal, pediatric, and adult patients across a wide range of clinical settings. The Guardrails® Software minimizes dangerous IV medication errors and monitors system performance to support facility compliance with national safety standards. The pump features an easy-to-read LCD screen displaying medication, dose, and rate information, with set-based free-flow protection for enhanced patient safety.

The system supports connection of up to four Alaris Pump Modules to a single point-of-care unit, allowing flexible configuration for multi-therapy infusion needs. The Guardrails® CQI Reporter is a PC-based application that generates custom reports and graphics to track performance metrics and meet facility-specific requirements.

This refurbished unit delivers reliable, efficient infusion therapy with proven safety features and clinical versatility.

FEATURES
