Baxter Sigma Spectrum Infusion Pump – Refurbished

Stock Photo – Options May Vary

FULLY REFURBISHED · CLINICALLY CERTIFIED

Baxter Sigma Spectrum Infusion Pump – Refurbished. The Baxter Sigma Spectrum is a compact, advanced infusion system designed to improve patient safety and clinical efficiency. This refurbished unit delivers the same reliable performance as a new device at a significantly lower cost.

Ideal for hospitals, outpatient centers, and long-term care facilities, this infusion pump meets high standards for safety, usability, and interoperability. Designed with smart infusion technology, the Sigma Spectrum helps reduce medication errors through integrated drug libraries and safety alerts. Its intuitive user interface features a bright, easy-to-read color screen that displays onboard help menus.

This makes it easier for clinicians to operate and troubleshoot in real time.
