

MCM Siderail Socket – Stainless Steel | MCM 162

Stock Photo – Options May Vary

FACTORY NEW

The MCM 162 is a stainless steel siderail socket designed for surgical and clinical use. Crafted from high-quality stainless steel, it offers long-lasting durability and robust construction that withstands the demands of daily procedures without compromising performance or stability.

This siderail socket is designed to accept flat bar accessories, making it a versatile addition to any operating room setup. Medical teams can attach essential tools and supports quickly, improving efficiency during procedures.

The MCM 162 easily secures to the ends or notches of standard operating table siderails, allowing for optimal positioning and flexible mounting. Its stainless steel construction and smart design enhance surgical workflow and deliver dependable support in any clinical setting.

FEATURES

- Long-Lasting Construction
- Accepts Standard Flat Bar Accessories
- Attaches at rail ends or notches
