Blickman Built-In Warming Cabinet | SW30TG

Stock Photo – Options May Vary

FACTORY NEW

Blickman Built-In Warming Cabinet: SW30TG – New. This cabinet fits recessed or built-in installations, including operating room wall consoles. It warms blankets or solutions at set temperatures from 90°F to 160°F.

In addition, the color display (160 x 180 pixels) lets staff read settings fast. The SW30TG helps your team stay accurate and keep work moving. A built-in temperature recorder with a real-time clock tracks heat over time, and staff can program solution warming between 90°F and 110°F.

Meanwhile, the self-tune feature holds the set temperature within ±1°F, and a calibration reminder helps your facility stay on schedule. A key lock or user-set passcode keeps settings safe.
