

Amvex Pediatric Vacuum/Suction Regulator Cont/Inter Combo | VR-PIU2

Stock Photo - Options May Vary

FACTORY NEW

The AMVEX Pediatric Vacuum/Suction Regulator VR-PIU2 combines digital accuracy with analog gauge familiarity for precise pediatric suction control. It delivers both continuous and intermittent suction in a single versatile unit, featuring a clear 0-150 mmHg gauge and $\pm 1\%$ full-scale accuracy. The design includes no moving parts and requires no calibration, reducing maintenance time and operational costs.

The regulator's modular construction allows easy upgrades from analog to digital within the facility, protecting long-term equipment investment. The removable backplate and gasket simplify cleaning, while reinforced inlet and outlet ports resist breakage during routine use, supporting durability in high-demand pediatric environments.

The VR-PIU2 supports multiple outlet connections, including DISS, Ohmeda, and PB, ensuring seamless system integration. A 5-Year Limited Warranty reinforces long-term value and confidence in daily clinical use.
