Baxter 6301 Dual Channel Infusion Pump – Refurbished

Stock Photo – Options May Vary

FULLY REFURBISHED · CLINICALLY CERTIFIED

The Refurbished Baxter 6301 Dual Channel Infusion Pump offers reliable performance for demanding clinical environments. Technicians have completely refurbished and biomedically inspected each unit to meet high-quality standards.

With dual channels, this infusion pump allows for the simultaneous delivery of fluids or medications, improving workflow and patient care. This model features a Dual Volumetric IV Pump, Flow Check Occlusion Alarm, and Flow Rate Calculation for added precision.

It also includes Incremental Flow Rate control and Programmed Delivery Profiles, making it ideal for a variety of infusion therapies. Moreover, these features ensure accurate and safe delivery of fluids for adult and pediatric patients alike.
