

Birkova Orthopedic Traction Boots: LS-9980

Stock Photo - Options May Vary

FACTORY NEW

Birkova's Orthopedic Traction Boots are designed to securely position and support a patient's foot during orthopedic procedures. Each boot features a soft vinyl cover with foam padding for comfort and durability. The boots attach to the foot plate of a traction unit assembly and are compatible with Amsco Orthographic I, Orthographic II, and Orthovision tables.

Each boot is equipped with three deluxe straps and Velcro closures to ensure a secure fit and prevent patient movement during treatment. The soft liner provides cushioning while maintaining stability throughout the procedure.

These traction boots are sold as a pair and do not include the traction unit assembly. They represent a reliable solution for orthopedic traction applications in surgical and clinical settings.

FEATURES

- For Orthographic I, Orthographic II, Orthovision and Orthopedic Extension
- 3 Deluxe Straps (per boot)
- Attaches to the Foot Plate of the Traction Unit Assembly (not included)

SPECIFICATIONS

- Pad Construction: Foam Padding
- Cover: Soft Vinyl
- Closure: 3 Velcro Straps (per boot)
