

Steris-Birkova Stretcher 3" Dura-Cloth Safety Straps w/Mounting Rings: PR-9000

Stock Photo - Options May Vary

FACTORY NEW

The Steris-Birkova PR-9000 stretcher straps are three-inch-wide restraints made from durable Dura-Cloth material designed to secure patients firmly during transport and procedures. The fabric resists daily stress while offering dependable flexibility and a soft texture that increases comfort during extended use.

Each set includes three two-piece straps with sturdy metal mounting rings that lock onto the stretcher frame quickly. Velcro closures allow for precise adjustments and reliable positioning while maintaining steady control for medical staff.

The PR-9000 straps are suitable for routine transfers, imaging sessions, and emergency response across multiple departments. The straps withstand frequent use and clean easily, helping healthcare facilities streamline patient handling and maintain consistent safety standards.
