Datascope Passport 2 Patient Monitor with CO2 – Refurbished

Stock Photo – Options May Vary

FULLY REFURBISHED · CLINICALLY CERTIFIED

Datascope Passport 2 Patient Monitor with CO2 – Refurbished. This monitor offers strong features with room to grow. Moreover, its plug-and-play design gives you a low-cost path for future upgrades.

As care needs change, staff can expand the Passport 2 system to match. The Passport 2 has a 10.4-inch color TFT display that stays clear in any setting. Furthermore, it supports 3 to 6 waveforms, which expand on their own as needed.

In addition, large numeric readouts adjust automatically for easy reading. This makes the monitor a good fit for emergency, ICU, or routine care.
