Edan F9 Express “Loaded” Fetal/Maternal Monitor

Stock Photo – Options May Vary

FACTORY NEW

Edan F9 Express “Loaded” Fetal/Maternal Monitor. F9 is a high-end fetal & maternal monitor; it offers the most advanced integrated monitoring for the delivery room in a big hospital, private obstetrician’s office, and antepartum clinic. F9, designed for moving situations, covers the entire continuum of antepartum, intrapartum, and postpartum applications.

The Edan F9 Express Fetal/Maternal Monitor offers a range of features for enhanced monitoring. It includes basic parameters such as FHR, TOCO, Event Mark, AFM, and internal parameters like IUP and optional DECG. Additionally, it supports 24-hour waveform playback.

You can also choose the optional built-in wireless module and software for data transmission to PC.
