FACTORY NEW

Enthermics DC750 25-Blanket Warming Cabinet – New. This quiet, efficient cabinet has no moving parts, so it suits labor and delivery rooms, ICUs, and NICUs. The free-standing, patient-friendly design fits easily into key care areas, so nurses and aides can focus on patients.

In addition, it warms up to 25 blankets at once. Soft blue lights inside create a calm feel in the room. Meanwhile, WarmSafe zone heating warms blankets fast to exact temperatures.

The heated shelves also balance heat across the whole cabinet, so every blanket warms evenly. Because it has no fans, the DC750 stays quiet, which lets patients rest during recovery.

FEATURES

• LED interior lighting casts a comforting blue glow with two (2) different intensity settings, and off-mode
• In the event of a power failure, the cabinet will remember its programming and begin to operate as before when power is restored. A warming shut-off system, separate from the electronic control, prevents overheating
• The access point and the plug have been added in the back panel to allow the appliance owner to add their data logger or temperature management hardware
• Single-chamber warming cabinet White epoxy-coated steel exterior casing and interior insert
• Glass Door: Single pane, energy-efficient, e-coated glass window in the door allows for inventory observation and reflects heat into the cavity

SPECIFICATIONS

• Chamber: Single-chamber warming cabinet
• Lighting: LED
• Capacity: 20-25 blankets
• Interior size: 7.5 ft3
• Dimensions: 34.9 in H x 24 in W x 27 in D
