GE MAC 1200 EKG Machine with Interpretation – Refurbished

Stock Photo – Options May Vary

FULLY REFURBISHED · CLINICALLY CERTIFIED

The Refurbished GE Marquette MAC 1200 Patient Monitoring Solution is a reliable, user-friendly system. It offers practical features ideal for smaller healthcare facilities.

Designed with flexibility in mind, the MAC 1200 is a compact 12-lead electrocardiograph capable of both ECG acquisition and analysis. The modular configuration of the MAC 1200 allows it to function as a basic ECG machine without analysis, which is ideal for facilities with minimal diagnostic needs.

It can also operate as a fully featured system with interpretive capabilities. Furthermore, the MAC 1200's adaptability and proven GE Marquette technology make it a cost-effective, efficient solution for diverse clinical settings.
