Intensa Hydraulic Surgical Stool | 748

Stock Photo – Options May Vary

FACTORY NEW

The Intensa 748 hydraulic surgical stool, formerly sold under the Hassoc name, is built for hands-free height changes in surgical and clinical settings. Because the chrome solid steel foot control runs the hydraulics, you can raise or lower the seat from 19.5 to 26.5 inches without reaching down.

In addition, a rotation lock holds the seat steady whenever you need a fixed position. The Intensa 748 stands up to daily clinical use.

Its 3.5-inch thick, fire-resistant foam gives firm, comfortable support with no bottoming out on the seat pan. Meanwhile, the 3/4-inch thick commercial-grade seat all but removes the risk of warping and breakage over time.
