

MCM 67" Patient Roller Board Replacement Cover | MCM 131

Stock Photo - Options May Vary

FACTORY NEW

The MCM 131 is a replacement cover designed to fit most standard 67" patient roller boards. Constructed from durable, medical-grade materials, it withstands repeated use while providing long-term protection and maintains a secure, tight fit during patient transfers.

The smooth surface enables quick, effective cleaning to help maintain strict hygiene standards in clinical environments. The cover enhances traction, reducing the risk of slippage during patient transfers and providing a supportive surface that improves comfort for patients.

Easy to install and replace, the MCM 131 cover offers a practical solution for hospitals and surgical centers. The cover is sold separately; the patient roller board is not included.

**Brochure and images are a general overview of the product. Actual product options may vary.*
