

MCM Set of Six, Stainless Steel Nesting Tables | MCM 560

Stock Photo - Options May Vary

FACTORY NEW

The MCM 560 is a set of six stainless steel nesting tables designed for medical facilities requiring durable, space-saving work surfaces. Each table features heavy-duty stainless steel construction with smooth surfaces that are easy to clean and sanitize, making them ideal for operating rooms, labs, and clinical environments.

The tables nest together when not in use, allowing facilities with limited storage to maximize work areas while maintaining organization. Square legs provide a larger fastening area that increases overall strength and stability, enabling the tables to handle frequent use without shifting or wobbling during procedures.

All six tables come equipped with ball-bearing casters for smooth, reliable movement across various surfaces. This mobility allows easy repositioning as needed without disrupting workflow, making the MCM 560 a practical addition to any clinical setting.

FEATURES

- Heavy-duty stainless steel construction
- Nest together for storage
- Set of 6 Tables
- Square legs allow for increased fastening area for increased durability
- Ball-bearing casters come standard

SPECIFICATIONS

- Construction: Heavy Duty 16-gauge, #304 stainless steel
- Table Edges: 1-1/2" revealed edge
- Casters: 3" ball bearing casters
