

MCM Malleable Anesthesia Screen | MCM 106

Stock Photo - Options May Vary

FACTORY NEW

The MCM 106 Malleable Anesthesia Screen delivers strength and adaptability in demanding medical environments. The 5/8" diameter mounting post fits securely into the standard Clark Socket (MCM 160, sold separately), allowing for fast and simple setup in any clinical setting.

The screen can be bent into nearly any shape, providing excellent flexibility for various procedures and patient positions. This feature supports precise adjustments during surgical preparation and enhances comfort and safety in the operating room.

Built with durable materials, the MCM 106 withstands daily use without compromising performance. Its solid construction ensures dependable support for anesthesia needs across multiple specialties and long-term clinical reliability in surgical settings.
