

MCM Minor Procedure Hand Table | MCM 318

Stock Photo - Options May Vary

FACTORY NEW

The MCM 318 is a minor procedure hand table built with lightweight carbon fiber construction, weighing only 9 pounds while providing one of the largest operating surfaces available. The leg-free design allows complete C-arm access during procedures, improving imaging capabilities and reducing interference during surgeries.

The table attaches securely to any standard operating room table using MCM's exclusive Posi-lock clamp system, ensuring a strong and stable connection throughout use. This design enhances both safety and workflow efficiency for hand and arm procedures.

FEATURES

- Lightweight yet durable carbon fiber construction
- The operating surface is one of the largest available
- No legs to interfere with C-arm access
- Clamps positively to operating room table with our unique Posi-lock clamps

SPECIFICATIONS

- Operating Surface Dimensions: 18" x 32"
- Table Weight: 9 pounds
- Clamps: Built-In
