MCM Central Sterile Instrument Wrapping Station | MCM 596

Stock Photo – Options May Vary

FACTORY NEW

MCM Central Sterile Instrument Wrapping Station: MCM 596. Mid Central Medical builds this station for dependable sterile processing. The stainless steel top and upper rack give staff a strong, stable surface for wrapping instruments in clean, controlled areas.

In addition, the 35″ work height reduces strain, so long tasks feel more comfortable and efficient in busy healthcare settings. The station rolls on heavy-duty 4″ locking casters. As a result, workers can move it with ease and lock it firmly in place when needed.

Meanwhile, the adjustable size fits many workspace layouts, which gives central sterile departments and other sterile processing areas the flexibility they need.

FEATURES

- Sturdy work style table design.
- Removable bins for easy cleaning and reloading instruments.
- Easy to move but can still look in place with locking casters.

SPECIFICATIONS

- Construction: Stainless Steel
- Table Dimensions: 32"D x 60"L x 34"H
- Work Height: 35'
- 4" Heavy-Duty, Locking Caster
