MCM 40″ Elite Transfer Board | MCM 192

Stock Photo – Options May Vary

FACTORY NEW

MCM 192 Elite Transfer Board helps staff move patients during daily transfers with less strain. It measures 40″ long by 16″ wide, so it works in radiology, operating rooms, ICUs, and many other departments.

In addition, the lightweight board has a smooth surface that lets patients slide across, which makes transfers faster and more comfortable. Meanwhile, it protects caregivers from back strain in hospitals, surgical centers, and specialty units.

Furthermore, Mid Central Medical offers the board in several sizes to suit different patients and facilities. Staff can pick the size that fits their patients and space.
