FACTORY NEW

The MCM 359 Extra Large Finger Trap is designed for surgical applications requiring secure digit immobilization during procedures. Manufactured by Mid Central Medical, an American producer committed to quality components and reliable performance, this finger trap meets rigorous standards for use in hospitals, surgical centers, and specialized clinics.

The device provides consistent, dependable functionality in demanding surgical environments. Its construction emphasizes durability and safety, supporting medical teams in delivering precise patient care while streamlining workflow during hand surgery procedures.

Mid Central Medical offers finger traps in multiple sizes to accommodate diverse surgical needs. The MCM 359 represents the extra-large option within their comprehensive product line of surgical accessories.
