Stryker Stretcher Backrest Gas Spring | 0360-031-077 – New

Stock Photo – Options May Vary

FACTORY NEW

Stryker Stretcher Backrest Gas Spring: 420N, PN: 0360-031-077 – New. This gas spring improves backrest performance on your Stryker stretcher. Furthermore, it's built for precise Fowler adjustment, delivering strong 420N support.

In addition, this brand-new, non-OEM replacement gives consistent lifting power during daily use. This gas spring is made from durable materials that hold up to the demands of clinical environments. As a result, caregivers get smooth, controlled backrest positioning for patient comfort.

The 420N force keeps elevation stable without sudden movement. Note: If your Stryker stretcher uses only one gas spring on the backrest, this is likely the strut you need.
