

MCM Wall Holder for 10" Wide Bariatric Armboards | MCM 446

Stock Photo - Options May Vary

FACTORY NEW

The MCM 446 is a wall-mounted holder designed specifically for 10" wide bariatric armboards, 24 or 26 inches long. Constructed from durable stainless steel, it securely holds armboards with pads attached while keeping them organized and accessible in healthcare settings. The compact design saves valuable space and prevents clutter on floors and counters.

Installation is straightforward with included mounting hardware that works on most wall surfaces. The holder's smooth edges protect armboards from damage, extending their lifespan and supporting infection control protocols. Its rust-resistant construction withstands daily use in busy hospitals and clinics.

The MCM 446 enhances organization and efficiency by keeping armboards readily available yet out of the way when not in use. Easy to clean and maintain, it helps medical staff work more effectively while promoting a cleaner, more organized healthcare environment.
