MPD Proximity Reader Cards Accessory | TPR-PC

Stock Photo – Options May Vary

FACTORY NEW

MPD Proximity Reader Cards Accessory: TPR-PC. The TPR-PC offers quick, secure access to carts equipped with proximity locking systems. Simply swipe the card to unlock. This touch-free system improves efficiency while maintaining strong access control.

Each card provides authorized users with fast entry, reducing delays during urgent care. Because the process is seamless, teams can focus more on patient care and less on manual access steps. In addition, MPD offers Proximity Card Adhesive Buttons to expand compatibility.

These buttons attach easily to non-compatible cards, instantly enabling the proximity function. As a result, you don’t need to replace existing ID cards.
