FACTORY NEW

MPD Malignant Hyperthermia Cart: MMH-330-DB. The MPD MMH-330-DB improves patient safety by keeping cold packs and saline solutions stored and ready for emergencies. This cart allows quick access to critical items during a malignant hyperthermia crisis.

Medical teams can respond faster because refrigerated supplies remain at the correct temperature. Its reliable design ensures that essential items stay organized and protected in high-pressure situations.

The MMH-330 features a 1.6 cubic foot refrigerator/freezer (120V, 60Hz, latex-free) with a temperature indicator for accurate monitoring. It comes with cold packs, a hospital-grade plug with a 10-foot cord, and a security sealing system.
