

MPD Trellis System Cart Accessory | STR-1

Stock Photo - Options May Vary

FACTORY NEW

The MPD STR-1 Cart Accessory is a trellis system designed exclusively for MPD Select Carts. It adds vertical storage capacity, optimizing space for critical medical supplies while installing easily and providing reliable support for compatible MPD accessories and trays.

MPD offers trellis systems for various cart types to meet different facility needs. The TTR-6 Trellis System is available for Standard Carts, the TTR-7 for Mini Carts, and the SHB-1 Trellis Bar (without uprights) for Select Carts requiring only the bar component. These options enable flexible, modular setups across departments.

The STR-1 enhances workflow by making supplies more accessible during urgent procedures. Its durable construction ensures long-term use in demanding healthcare environments, supporting mounted bins, baskets, and other storage accessories that improve efficiency and organized care delivery.
