

Oakworks CFPM200 Imaging Table with Integrated Headrest

Stock Photo - Options May Vary

FACTORY NEW

The Oakworks CFPM200 is a 2-motion imaging table engineered for pain management, interventional procedures, and advanced imaging applications. The carbon fiber integrated headrest top delivers superior radiolucency for crisp, unobstructed imaging. A removable Comfort Foam® pad and integrated crescent face rest provide optimal patient comfort during extended procedures.

Designed for both patient safety and clinician ergonomics, the CFPM200 offers a generous height range to facilitate safe patient transfers while allowing medical staff to work in ergonomic positions. The sturdy lift column delivers exceptional rigidity and stability, with a smooth electronic lift tower enabling seamless height adjustments through an intuitive hand control.

The table includes an emergency stop switch for immediate power cutoff during emergencies, locking casters for secure positioning or mobility, and two patient safety straps for secure positioning throughout procedures. It operates on standard 110V power and is suitable for high-performance clinical environments.

FEATURES

- Carbon fiber integrated headrest top with removable radiolucent Comfort Foam® table top pad
- All functions hand control
- Electronic lift tower
- Emergency stop switch to cut power from the table in an emergency
- Locking casters for mobile or permanent positioning
- (2) Patient safety straps
- Motion 1 - Electric Height Range 25" - 43" (64-109cm) Height Range without pad
- Motion 2 - Electric Lateral tilt $\pm 15^\circ$

SPECIFICATIONS

- Carbon Fiber Top - 22"x84" (56cm x 214cm)
- 56" (133cm) Metal free imaging space
- Motion 1 - Electric 25" - 43" (64-109cm) Height Range without pad
- Motion 2 - Electric Lateral tilt $\pm 15^\circ$
- Weight Capacity - 500 lb (227kg)
- Product Weight - 475 lb (216kg)
- 2 in. (5cm) Radiolucent Comfort Foam® table top pad
- 4 in. (10cm) locking casters
