

SchureMed Berchtold B810, B710 Surgical Table Replacement Pads

FACTORY NEW

SchureMed Berchtold B810 and B710 surgical table replacement pads are engineered for pressure management in operating room environments. The pads feature multiple layers of foam designed to maximize pressure-reducing properties and conform to the patient's body while providing adequate support. SchureMed draws on over 20 years of experience in pressure management, utilizing engineered foams and covering materials to prevent pressure-related injuries to bony prominences during surgical procedures.
