

SchureMed Berchtold Operon D850, D750 Surgical Table Replacement Pads

FACTORY NEW

SchureMed replacement pad designed for Berchtold Operon D850 and D750 surgical tables, featuring a 24" leg extension. The pad incorporates multiple layers of engineered foam to maximize pressure-reducing properties and enhance patient comfort during surgical procedures.

The multi-layer foam design works together to provide optimal support and cushioning with effective body conforming. Each layer is engineered to prevent bony prominences from bottoming out while maintaining long-lasting comfort throughout extended procedures.

This pressure management solution minimizes the risk of pressure sores and improves patient safety in the surgical suite. SchureMed draws on over 20 years of experience in pressure management to deliver superior pressure distribution through carefully selected foam and covering material combinations.
