

# SchureMed Midmark Montreal Surgical Table Replacement Pads

*Stock Photo - Options May Vary*

## FACTORY NEW

SchureMed Midmark Montreal Surgical Table Replacement Pads are engineered pressure management solutions designed for operating room tables, stretchers, arm boards, and related surgical equipment. The pads feature multiple layers of foam specifically formulated to maximize pressure-reducing properties and conform to patient anatomy while providing essential support during surgical procedures.

With over 20 years of experience in pressure management, SchureMed has developed these pads through careful selection of engineered foams and covering materials. The multi-layer construction addresses the critical challenge of balancing conformability, body support, and protection of bony prominences to prevent bottoming out.
