

SchureMed Softcare Plus Silver Stretcher Pads

Stock Photo - Options May Vary

FACTORY NEW

SchureMed Softcare Plus Silver Stretcher Pads feature a waterfall design with no top-edge seams for enhanced infection control. All pads have four rounded and contoured corners to fit most stretchers and are suitable for PACU, Endoscopy, and Ambulatory/Same Day/Outpatient Surgery Room applications.

These pads are also ideal for Operating Room, Extended Stay, and Emergency Room use. The Softcare Silver construction offers superior pressure management with silver embedded in the pad cover to increase antimicrobial properties and reduce odor-causing bacteria.

Softcare Plus stretcher pad surfaces are available in multiple lengths and thicknesses to fit most manufacturers' stretchers.
