# Tuttnauer Internal Printer | 1610100

*Stock Photo – Options May Vary*

**FACTORY NEW**

Tuttnauer Internal Printer, Model 1610100 – New. This printer gives you cycle documentation for compliance and record-keeping. It logs date, time, temperature, and pressure to keep sterilization records accurate.

In addition, it captures this data automatically with every cycle, so nothing gets missed or written down by hand. This printer works with several Tuttnauer autoclave models, including the EZ9, EZ10, EZ10K Fully Automatic Kwiklave, and the 3870EA Fully Automatic Autoclave. Furthermore, it's a solid choice for clinics, dental offices, and medical facilities that need traceable sterilization data for audits or inspections.

Adding this printer to a compatible autoclave gives staff a clear paper trail for every load run.
