Winco Transmotion Multi-Purpose Stretcher-Chair | TMM4

Stock Photo – Options May Vary

FACTORY NEW

Winco Transmotion Multi-Purpose Stretcher-Chair: TMM4. One Patient, One Surface™ from admission to discharge! Weight patients, Imaging, Procedure, Recline, and Transport with one chair!

An innovative powered patient positioning reduces the possibility of staff injury, decreases patient fall risk, and improves throughput. The TMM4's back, leg, and height adjustments enable conversion from chair to stretcher with the push of a button. It's a transport device, procedure chair, and stretcher all in one!

It can be configured for departmental needs through a variety of options and accessories. The TMM4 can be configured for departmental needs through a variety of options and accessories.
